

What is Click to Collect?

Clinical Labs' Click to Collect is our online courier booking service, which enables medical clinics and vets to request a courier pick-up with the click of a button – providing up-to-date arrival times and real-time GPS tracking.

Click to Collect Courier Map:
The map shows your location, and will update with courier driver information when your driver is nearby.

3) How to use Click to Collect

Requesting an adhoc pick-up using Clinical Labs' Click to Collect platform is now quicker and easier than phoning. Just make sure your specimens are ready for pick-up and then click 'Request Pickup'. If you have more complex needs please call the Courier Office on 1300 134 111.

Requesting a pick-up

1. Enter the initial number of specimens to pickup, and indicate if you have placed these specimens in your lockbox
2. Provide the name of the Requesting Person.
3. If your specimens are urgent, please provide a comment in the comments section to help us understand the reason for urgency.

Editing your pick-up request

1. You can edit/add comments or change the toggle indicating whether specimens have been placed in the lockbox for couriers to pickup.
2. There is no need to update numbers of specimens – our courier drivers can do this when they arrive. If you need a more urgent pickup please request a new pickup using the Request Pickup button.

Cancelling your pick-up request

If you need to cancel a courier pickup you will need to contact our Courier Office on 1300 134 111

Editing your clinic details and opening hours

Maintaining your opening hours will improve your service by informing us when to expect your specimens will be left in a lockbox. For sites without this facility, we will know when your staff will be available to handover specimens to our couriers.
